

Rapid rule out hs-cTnT protocol - NUTH

*If there is still clinical doubt, reassess patient:

- Repeat history
- Repeat ECG

Unstable angina is possible in patients with hs-cTnT below 99th URL .
These patients are low risk and may still be discharged with
treatment and plans for further investigation

† Take into account

- Pre-test probability of NSTEMI
- Possibility of chronically elevated cTnT in some patients
- Other reasons for elevated cTnT eg PE, sepsis, arrhythmias
